## Review of existing plans

---

*Our customers  
have won prizes!*  
**Bahlsen –  
Factory of the Year 2011**  
(excellent location development)

---

### Your challenge

You have an existing factory layout and would like it to be evaluated by an expert? You suspect your production has logistical potential and do not know whether restructuring could significantly increase the profitability of your company? You have made a plan and would like to have it looked over with a fresh pair of eyes? Then we would be happy to support you in reviewing your existing plan or layout.

---

### Your benefits

- Identification and estimation of logistic potential for your factory
- Objective assessment of your existing factory layout and derivation of measures for improvement
- Objective assessment of your planning status and derivation of suggestions for improvement
- Consideration of long-term factory planning expertise and best practice experiences

---

### Our service

- Development and documentation of target and structural fields for your factory (e.g. versatility) and transformation into concrete requirements (e.g. modular layout)
- Systematic analysis of the existing layout or your planning services in the context of workshops concerning identified target areas and requirements
- Identification, documentation and evaluation of improvement measures

---

### Our commitment to quality

- Systematic organization and implementation of workshops
- Consideration of current research findings and best practice solutions
- Comprehensive documentation of results and planning services
- Directly applicable results: smooth transferability into your own planning work

---

### Your contact person

We would be happy to make you a customized quote.
