

Greenfield planning

Our customers
have won prizes!

**Bahlsen –
Factory of the Year 2011**
(excellent location development)

Your challenge

Your factory capacity is bursting at the seams? Does the elimination of individual weakness not lead a satisfactory overall solution, even over a long period of time? Would you like to change your production program in the medium- to long-term? Planning a new factory location because working efficiently has become impossible at your current location? Then we would be happy support you in planning your factory on a greenfield site.

Our service

- Development and documentation of target and structural fields for your factory
- Reception of planning-relevant information about the actual state (e.g. equipment, material flows) and forecast data
- Definition of technically, logistically, organizationally and economically suitable structural units
- Development and assessment of ideal and actual layout variants using the defined requirements and selection of a preferred alternative
- Preparation of detailed layout on work system level
- Determination of the costs resulting from the planning variant (in cooperation with architects and building engineers)
- Building design, implementation planning and project management (optionally by architects)

Our commitment to quality

- Systematic project organization and project implementation, proven planning methods
- Consideration of current research findings and best practice solutions
- Comprehensive documentation of results and planning services
- Directly applicable results: smooth transferability into your own implementation phase

Your benefits

- Cost and time reduction as well as quality improvements through optimized material, information and communication flows
- Consideration of your future business developments in the form of versatile and well-dimensioned factory structures
- Strengthening the sustainability and competitiveness of your factory
- Consideration of long-term factory planning expertise and best practice experiences
